REASONS FOR ALLOWANCE

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference cited on the PTO-892 discloses a multi-layer recording/reproducing apparatus including an astigmatism generating device.

The following is an examiner's statement of reasons for allowance: the prior art of record considered as a whole fails to teach or suggest an information recording and reproducing apparatus for optically recording/reproducing information on/from an information recording medium having a plurality of information layers by concentrating a light beam on tracks of each information layer, comprising: an optical receiving device for receiving a reflected light from the each information layer to output a light receiving signal on the basis of a projected image formed on a light receiving surface thereof; a tracking error detecting device for detecting a tracking error on the basis of the light receiving signal; and **a rotating device for rotating one projected image on the light receiving surface at a predetermined angle with respect to another projected image, the one projected image corresponding to a reflected light from a target information layer for recording/reproducing, the another projected image corresponding to a reflected light from another information layer except the target information layer.** (bold language emphasized).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Huber whose telephone number is 703-308-1549.
